R. F. D. NO. 2

Decorated Pottery, Cacti, And Desert Flora
Largest Individual Grower And Collector
Of Hardy Cacti In The World

EASTLAND, TEXAS

Jan. 18-34

U.S. Dept. of Agriculture,
Mr. E. C. Aarhter,
Washington D.C.

Dear Sir:

Enclosed lists as requested. I do not issue a catalogue and being strictly a wholesale grower and collector, I do have any mailing list as my business is established to the extent that I don't go after business.

Yours truly
Guy S. Quinn

DEALERS' PRICE OF CACTUS POTTERY

All prices quoted are F. O. B. Atascosa, Texas, packed in strong crates and no charge for packing.

Our pottery is made of a good grade of clay, hard burned and very durable, not as easily broken as the common Mexican pottery. It is decorated by Mexican artists in beautiful, variegating colors with oil enamels. The same low prices prevail for both plain or decorated pottery.

CACTUS OR FLOWER POTS

Diameter	Per 100
1 $\frac{1}{4}$ inch.....	\$2.00

Complete Desert Rock garden collections \$2.50 up. Satisfaction or money refunded. Large Cacti a Specialty. All small plants 25c at 100 rate. All 10c plants \$1.00 per dozen. 15c plants \$1.50 per dozen. On orders for 1000 or more I will prepay anywhere in the Continental U. S. All orders shipped by 2nd class express unless otherwise instructed. If sent by Parcel Post include postage with order and if any over it will be mailed back to you at once. No Delay. I ship in most cases same day order received.

Mistletoe furnished through November and December at 5c per lb, well berried. Complete Service. I will obtain anything you want in Cacti through my connections. Give botanical name or description.

Cultural Instructions

When received plants should be placed in a vat of water for 2 or 3 hours, then cleaned with a strong stream of water and a pair of tweezers. They should be set in good sandy clay loam to which a very small amount of slacked lime has been added, if soil does not contain lime. If roots interfere in potting, they may be removed. In case roots are cut off dry thoroughly in hot sun or in any dry hot atmosphere after removing and reset on a small pocket of sand. If any plant shows decay, cut out the bad tissue and place in hot dry position. They transplant at any season, but much better in the hot summer months. If set outdoors they should have a well drained position or if potted the pot should be $\frac{1}{2}$ full of rocks. They will not stand wet, soggy soil. All plants are named on tag and color, shade or sun indicated. The plants in this shipment are not nursery grown. They are shipped as removed from natural position where they have been subject to zero temperature. They stand hard freezing without injury but will not stand too much water. They are shipped rough, as in cleaning they absorb their weight in water and make excessive carrying charges. All orders shipped same day received. I sell to the trade only.
